

WEEKLY MARKET PRICE

04-2025

- *The global cotton market continues to navigate through challenging times marked by weak demand, rising stockpiles, and fluctuating prices.*
- *The polyester market continues to navigate a dynamic landscape shaped by fluctuating crude oil prices, supply constraints, and variable demand across downstream products like polyester fibers and yarns.*
- *The Chinese fiber and yarn market demonstrated general stability over the past week, with only minor variations observed across different yarn categories.*
- *The Indian fiber and yarn market is characterized by divergent trends across materials. Cotton continues to face price challenges amid global pressures, while polyester and viscose benefit from stable demand and favorable market conditions.*
- *Despite a 5.55% growth in Pakistan's overall textile and clothing exports in December, cotton yarn exports fell sharply by 34%.*
- *The polyester market's recent performance highlights a steady rebound, particularly in China and India, with crude oil price movements providing critical support.*

CONTENTS

1. MARKET PRICE	3
1.1 Cotton yarn	4
